even people from elite class who are very rich or famous actors they have free time options they after a while some indulge in homosexuality and build a prefence for it

2. The lie that is uncurable

First of all a matter of fact is that the LGBTQ+ Agenda is active an it is trying the best to spread their ideologie

Okay so the first thing for the cure is you need to understand the Brain is Neuroplastic

that means the habit and thoughts and experience you do then this part of you memories synpases neurons get stronger and then the habit you do not do not think or experience it it will get weaker after a while

so the cure is to weaken this side of the brain and strenghten the right side of the brain

so try as good as possible to quit watching or thinking indulging to it yes it is going to take time

the worst thing you can do is indulging in the act

because each time your stimulate you body with intimiate acts it will adopt to it

if you stay away from sexual acts your brain is actually becoming more sensitive in memory neurons

and in this state you need to indulge in the right and correct way wich is intimacy between husband and wife and each time you indulge in intimacy with the opposite partner it will strenghen the right part of the brain

you should try to finde the opposite gender attractive and with your tought experience should be with the opposite gender

and try as good as possible to hate the wrong thoughts feel disgusted by homosexuality

but yes you dont have kill yourself with the toughts you need to steer it in the right direction it will take time

the healing process can be boostet if you use tadalafil as male or female

and for female use clomids

and male endoclomiphene or estrogen blockers

but be causes these should only used in low dosage and sometimes and only with doctors because of the side effects and monitoring sometimes you dont need hormone therapie but sometimes you need

too much estrogen makes men feminine

too much tesosterone makes women masculine

for example the male is dominant

female is submissive

it is important that you behavoir and hormones are right

the doctors knowledge is corruptet some say it is normal for a man 200 -300 ng/dl testosterone its normal but its not

some say women have 25-300ng/dl testosterone so imgine what it does to the body and brain

and yes it is not always the cause for homosexual bevavior but can be a factor

and the medicne tadalafil will boost the brain sexual function and it is very important not to thing about or indulge in homosexual activity because it will only damage yourself more

your thought and action intimacy should be only those of hetrosexual and help wire correct part of brain after a while it will heal it can take time but the result are to bee seen after a while
